About us

Navigating the uncharted

Change is inevitable, but progress is optional. We can either resist the new forces that are shaping the world of work, or we can harness them to create a better future."

Welcome to the Hays 2024 Canada Salary \& Hiring Trends report!
For over a decade, we've been committed to providing you with valuable insights. Our mission isn't just about filling job vacancies; it's about equipping you with the knowledge to stay ahead in a dynamic market. Whether you're a seasoned professional or a rising star, this report is your compass for navigating the ever-evolving world of work.
In 2022 we told you 60\% professionals were going to leave, and that year Canadian vacancies were $75 \%$ higher than 2019. In the US, where we saw the same percentage of people wanting to leave, 71 million jobs had to be filled, in a workforce of 161 million working Americans. The number of professionals intending to leave their job this year is the highest that we have ever seen (71\%), which means managers need to prepare for a potential new wave of resignations.
It's unsurprising when we are dissatisfied or when we are stressed, we are prone to change, we are prone to change. Following a year of layoffs and further inflation pressures, workers are dissatisfied with their compensation, benefits, and just generally fed up.
Do you know who doesn't worry about the satisfaction levels? A robot.
While the robots are not taking away our jobs... yet, employers seriously need to consider upskilling their employees in Al. You can either learn to use Al and thrive or keep your head in the sand and get run over by your competition. You probably have employees who are putting entire client lists, or presentations into an Al tool and asking for a summary, or research assistant. And that's a risk, that some, like the New York Times, are taking very seriously. But our research suggests many are not.
There's a lot of press now about why we should worry about DE\&I programs. Is this just a woke agenda, or should we really be worried? In short, yes you should worry. Not only is DE\&/ good for business, it's also good for the wellbeing of the people that work in the company, and it encourages innovation, problem solving and contributes positively to social impact.
I can also tell you from a Hays perspective, that it helps you to attract people. Our recruiters are on the front line of the talent market, and they can tell you that candidates are increasingly looking for employers who value and promote diversity, equity, and inclusion. They want to work for organizations that reflect their values, their identities, and their aspirations. They want to work for organizations that are not only diverse, but also inclusive and equitable.
These challenges are not just messing with the mood and performance of teams, but also the ability of organizations to attract, keep, and grow the best talent in the market.
Change is inevitable, but progress is optional. We can either resist the new forces that are shaping the world of work, or we can harness them to create a better future. We hope you find this guide useful and interesting, and that it helps you make smart decisions about your career and your organization.

## Travis O'Rourke

President Hays Canada

N

## LOOKING <br> FUTURE

## Three game changing forces impacting your teams that you can't afford to ignore this year:

- First, the winds of change blow stronger than ever, with the highest number of professionals considering a change. We explore the reasons behind this trend and the implications for businesses striving to retain and attract top talent.
- The digital and Al revolution is transforming the industry. Our guide unravels the intricate relationship between Al and the workforce, dissecting the challenges and presenting measures organizations must undertake to harness the potential of this technological wave while ensuring the well-being of their employees.
- Many employees and employers are unaware of the diversity, equity and inclusion (DE\&I) policies of their organizations, which is a worrying sign of low priority and commitment to creating a diverse and inclusive workplace from the organizations. More efforts are needed to raise awareness and promote the importance of DE\&/ policies in the workplace.

Embark on this journey with us as we navigate through the currents of change, providing insights, analysis, and actionable strategies to help organizations thrive in the ever-evolving world of work in 2024.

## QUIET QUITTING IS GETTING LOUD

Quiet quitting was the dominant theme in 2023, defined as 'putting in no more time, effort, or enthusiasm than necessary' this trend is evident in labour productivity, which has declined nationally in six consecutive quarters.
But this quiet quitting trend could be about to turn into real quitting. More people than ever are considering quitting their jobs and looking for better opportunities elsewhere. With nearly three quarters of employees considering leaving their current roles.

The closest to this we've ever seen was in our 2022 guide, when $61 \%$ of workers told us they wanted to leave their jobs. In that year we saw the real great resignation, with job postings increasing by $21 \%$ on top of 2021's already high levels. 2022 vacancies were some $75 \%$ higher than pre-pandemic 2019. Leaving Canada with a vacancy rate increase from $3.2 \%$ in 2019 to $5.4 \%$ in 2022.
And as the economy recovers this will only get worse. As $25 \%$ of the workers that answered they don't intend to leave their jobs this year, they would consider leaving when the economy and unemployment stabilize, increasing the potential leavers to $78 \%$.
And as our data reveals what appears to be an end to the layoffs, with $51 \%$ even intending to increase their headcounts, job opportunities in 2024 could be about to rise, giving these employees ample opportunity to make the move.
$\qquad$

Over the next 12 months, employers expect permanent employee headcount to:

## Employees are not ok...

55\% employees feel more stress this year than last year

46\% employees are unmotivated

Canadian workers are fed up. From wages that haven't really kept up with inflation, to mounting stress, there's a noticeable rise in dissatisfaction levels among employees, especially concerning salary, job roles, and benefits. This is leaving Canadian managers with an unmotivated workforce.

The increasing cost of living in Canada compounds this challenge, putting additional strain on employees' financial well-being.

## Compensation matters

Employees want better remuneration, benefits, and opportunities from their employers. Despite uncertainty in the global market, hiring managers still anticipate increases, with $87 \%$ responding they anticipate making pay raises in the next 12 months.

## Pay raises in the next 12 months:

- $59 \%$ of respondents intend to ask for a pay raise
- $33 \%$ of these respondents are expecting an increase of 3 to $5 \%$ from their employers
- And $23 \%$ of the respondents that expect a pay rise, are looking for a $10 \%$ increase

## In the next 12 months, organizations stated employees salaries will change:

- $13 \%$ no increase intended
- $20 \%$ increase $1-2 \%$
- $51 \%$ increase $3-5 \%$
- $8 \%$ increase 6-9\%
- $8 \%$ increase by more than $10 \%$

It's essential to recognize that not all employers are financially equipped to meet these expectations but there are still things they can do. Therefore, workers and employers may need to negotiate carefully and consider other factors, such as benefits, work-life balance, and career development.

## The top benefits workers want:

Support for professional study

Vacation
days above
mandatory

Mental and physical health and wellbeing programs

Top 3 motivators outside of salary:

$35 \%$ Greater recognition by the company

29\% Training and continuous education

29\% More responsibility and promotion

## Navigating the return <br> to office landscape

While a substantial $27 \%$ of employees express a preference for fully remote work in their future job searches, the current trend suggests a return to office spaces by organizations. In 2024, only $6 \%$ of organizations are expected to maintain a completely remote work structure.
The return to the office transcends mere physical relocation; it symbolizes an opportunity to redefine our office environments to tackle the challenges companies are facing

These spaces serve as dynamic hubs for innovation, productivity, and community interaction. Consequently, organizations are expanding their in-office days, with 88\% aiming for a hybrid or fully onsite model this year.

## Top reasons employers want people in the office more:

It will increase
productivity
productivity

To align with their organizational culture

For training and development

Organizations recognize a return to the office presents a distinctive chance. It allows them to facilitate professional development more easily with in-person learning, and coaching moments.
Additionally, the habits, rituals and visual clues that help to cement a company's culture are more easily leveraged in office.

## DON’T SNOOZE ON AI

Al is transforming the workplace in many ways, and its impact on the workforce is a topic of much discussion, but little has been done. And everyone seems to see it as someone else's problem.
We asked our participants their view on the impact of AI on employment prospects, and $43 \%$ (employees and organizations) felt Al will eliminate more employment opportunities than it will create. However, few (14\%) are concerned about it replacing their role.
According to a report by Future Skills Centre, 20\% of Canadian jobs are at high-risk due to automation and technology, including AI. The report also notes that AI will require new skills and training for workers, particularly STEM, creative, and business and legal professionals ${ }^{1}$

## The main advantages of using Al for the organizations:

Increase productivity and efficiency

For creativity and idea generation

Reduced risk human error

When asked about the potential impact of AI both employers and employees agreed much is to be gained, particularly in areas where organizations are struggling most, productivity.

[^0]
## Missing out on AI opportunities

Despite all the benefits few are doing much to consciously apply this. While AI has the potential to increase productivity and improve working conditions, it also raises concerns about job displacement, invasive surveillance, and data privacy.

- Only $40 \%$ of organizations mentioned they encouraged the use of Al technologies or tools
- $57 \%$ of organizations do not have established protocols for the use of Al and $79 \%$ of employees are not aware of any AI protocols in their business.
- $42 \%$ of organizations are still considering the implications of AI before acting.

It is important for organizations to take a responsible approach to Al and ensure that its impact on workers is carefully considered.

## How to embrace AI and avoid the pitfalls

The transformative potential raises critical questions for organizations that need to be addressed. Are they equipped with the necessary technical talent and infrastructure to harness the full potential of Al and to protect their organization from the security risks? Employees will need to acquire new skills and knowledge to effectively collaborate with these technologies. Not just in how to make the most of them, but how to use them securely. Your employees may be putting confidential data into the system, which could inadvertently reveal trade secrets in future queries. Balancing technological advancements with robust data protection measures is imperative.
Embracing this shift requires a strategic approach encompassing:

- Technical expertise: Organizations need individuals skilled in AI development, implementation, and maintenance to effectively integrate AI solutions into their operations.
- Risk infrastructure: As Al adoption brings new challenges such as data privacy, cybersecurity risks, and ethical considerations, businesses need robust risk management frameworks in place to mitigate potential pitfalls.
- Training and upskilling: Investing in continuous learning and upskilling programs is crucial to prepare the existing workforce for the use of Al.

## THE DE\&I <br> CHALLENGE

As budgets have tightened, and productivity has dropped, organizations seem to have taken their eyes off DE\&I to their peril. While many organizations may have DE\&I policies in place, there's often a gap perceived by employees between the existence of these policies and their implementation or genuine commitment from leadership.
This perception impacts employee trust and engagement
We've seen reductions in the number of people aware of their organization's DE\&I policies (just $59 \%$ said their organization has a policy, vs $70 \%$ in 2023), and $52 \%$ of employees tell us they don't believe their organizations take DE\&I seriously.
This is a concerning trend, as our research consistently highlights how important DE\&I is to workers, with $87 \%$ telling us it's important to them that an organization has a clear strategy around DE\&I.
This could be fuelling dissatisfaction levels, impacting trust, respect, and collaboration among colleagues. As well as the more obviously harmful potential discrimination and harassment issues.

employees feel their organization doesn't take DE\&ll policies seriously

of hiring managers said they don't have a DE\&I policy or are unsure if their organization does

## How to promote labour inclusion by considering diverse perspectives

When asked what the most important change they'd like to see in their organization, employees said considering different and diverse perspectives before changes are implemented and decisions are taken. By valuing and incorporating the input of various stakeholders, an organization can create a more inclusive and productive work environment for everyone.
This also extends to training your own employees to do the same, with unconscious bias featuring highly as one of the most beneficial DE\&I training topics workers would like to receive, along with age, diversity, and race.
Despite this just $46 \%$ of organizations offer unconscious bias training, $56 \%$ age diversity, and $58 \%$ race exploration, further highlighting the misalignment between workers and their employers.

Age diversity: multigenerational

## Most important changes employees want to see:

43\% Considering different and diverse perspectives before changes are implemented and decisions are taken

30\% More divers representation in the leadership
team

16\% More education around different DE\&I topics

## Top DE\&I trainings employees want:

Race: Exploring considerations of ethnicity, anti-racism, privilege and allyship

## Move from words to results in your workplace

It is crucial to address the concerns of employees who feel unheard. When employers do not have, or don't update their DE\& policies, they may miss out on the benefits of having a diverse and inclusive workforce, such as increased innovation, productivity, and customer satisfaction.
To achieve real DE\&I results, companies must consider the following recommendations:

- Create a safe space for open communication: Encourage employees to share their thoughts and ideas without fear of judgment or retaliation. This can be achieved through regular feedback sessions, town hall meetings, and anonymous surveys.
- Provide training and education: Offer training programs that employees request. Helping employees understand the importance of creating an inclusive workplace and provide the tools to do so

## We asked organizations the actions they have taken to promote labour inclusion; these are the 3 top answers:

$53 \%$ Having a clear process of encouraging people to report any type of discriminatory action occurring within the company

51\% Having inclusive hiring policies for all types of profiles

40\% Adapt workspaces for people with physical or motor disabilities

## NAVIGATING THE <br> UNCHARTED

Change is our constant companion as we navigate the complex and dynamic landscape of workforce trends. Whether it's the next great resignation or the evolution of the quiet quitting phenomenon, something needs to change between workers and employers. As we move forward, we have a unique opportunity to leverage our resilience and embrace the new possibilities that lie ahead. Let us not try to return to the ways of old, but rather reimagine our work as a place where prosperity and purpose go hand in hand.

## What you need to know:

1. Employee dissatisfaction is a prevalent theme, with $71 \%$ contemplating leaving their current positions due to stagnant wages, job role dissatisfaction, and perceived benefits inadequacies. This emphasizes the need for organizations to reevaluate.
2. To thrive in this transformative era, managers must embrace Al's potential. Considering the potential for it's use in their teams, and what support their people will need to leverage it's benefits safely and effectively.
3. Diversity, Equity, and Inclusion (DE\&I) are central to talent attraction, but a gap exists between policies and implementation. By listening to and addressing the requests of their employees, organizations can foster a more diverse and inclusive workplace culture, as well as improve employee engagement, satisfaction, and performance.

Prioritizing employee well-being and how you enable all your people to thrive and embrace change will be instrumental in navigating the future of work successfully.

## SALARIES AND COMPENSATION

Within the pages that follow, you'll encounter gross annual salary figures expressed in thousands of Canadian dollars, alongside contractor rates presented as hourly wages. Keep an eye out for the distinctive * icon, it signifies a "hot job," where demand is poised to surge in the coming year.
However, it's essential to recognize that these figures serve as indicators, not absolutes.
Variations exist across cities, influenced by local dynamics and market nuances. For more precise and detailed information,
we encourage you to engage with our knowledgeable local experts.
